WAYPOINT

WEEK 1 - LINK-CHECK RECORD

Community Resource Directory

Navigation, interactive features and development progress

PROGRAMME Ishvexa Hub Web Development Internship	**ASSIGNMENT** Week 1: Plan the experience
PREPARED BY Epifania Luisa Cazembe	**DATE** 6 November 2026

1. PURPOSE

This document records the navigation links and interactive elements reviewed during the first week of development of the Waypoint Community Resource Directory. It identifies which links and features are working, which have been implemented but still require testing, and which parts of the planned website are not yet complete.

2. LINK-CHECK RESULTS

Waypoint Logo

Expected behaviour: Return the user to the Home page.

Status: Working

Notes: Clicking the logo takes the user back to the Home page.

Home Navigation Link

Expected behaviour: Navigate to the Home section.

Status: Working

Notes: The link returns the user to the Home page.

Resources Navigation Link

Expected behaviour: Navigate to the Resources section.

Status: Working

Notes: The link scrolls to the Featured Resources section on the same page.

About Navigation Link

Expected behaviour: Navigate to the About section.

Status: Working

Notes: The link scrolls to the About section on the same page.

Featured Resource - View Profile

Expected behaviour: Open the selected resource's profile information.

Status: Working

Notes: The button opens a popup containing the resource information.

Popup Close Button

Expected behaviour: Close the resource profile popup.

Status: Working

Notes: The popup closes when the close button is selected.

Resource Search

Expected behaviour: Filter resources based on the user's search input.

Status: Implemented - Needs Testing

Notes: Search functionality has been added and requires further testing.

Category Filter

Expected behaviour: Display resources based on the selected category.

Status: Implemented - Needs Testing

Notes: Category filtering has been added and requires further testing.

Browse by Category Cards

Expected behaviour: Allow users to explore resources by category.

Status: Implemented - Needs Testing

Notes: The category cards and their interactions require further testing.

Mobile Layout

Expected behaviour: Display the website appropriately on mobile devices.

Status: Implemented - Needs Testing

Notes: Responsive styling has been added. Testing on different screen sizes is still required.

Separate Resources Page

Expected behaviour: Open a dedicated Resources page.

Status: Not Implemented

Notes: Resources currently appear as a section within the main page.

Separate About Page

Expected behaviour: Open a dedicated About page.

Status: Not Implemented

Notes: About currently appears as a section within the main page.

3. SUMMARY OF FINDINGS

During the first week, the main navigation links and resource profile popup were checked and are working as expected.

The website currently uses a single-page layout. The Resources and About navigation links move users to their respective sections rather than opening separate pages.

Search, category filtering, category browsing, and responsive layout features have been implemented. These features still require additional testing to confirm that they function correctly across different inputs and screen sizes.

4. ISSUES AND INCOMPLETE ITEMS

- Test the search function using different keywords.
- Test category filtering with different categories.
- Confirm that category cards navigate or filter as intended.
- Test the layout on mobile and desktop screen sizes.
- Confirm that all resource profile popups display the correct information.
- Create separate Resources and About pages if required by the final project scope.

5. NEXT STEPS

1. Continue testing the implemented interactive features.
2. Fix any issues identified during testing.
3. Review the website's navigation and responsive layout.
4. Update the link-check record as more features are completed.
5. Continue development in line with the internship project requirements.

6. CONCLUSION

The first week focused on establishing the structure and initial functionality of the Waypoint Community Resource Directory. The main navigation and resource profile popup are functioning, while other interactive and responsive features require further testing.

This record provides a baseline for tracking the website's progress and identifying areas for improvement during the next stages of development.
